SUBJECT: Underground Storage Tank Closure, NC DOT I-85
and Highway 119, Haw River

Dear Mr. Watkins:

On April 10, 1991, we received the soil sample results and closure assessment from the underground storage tank (UST) closure at the subject location. As the implementing agency for both the State and Federal Underground Storage Tank Programs, we have determined from review of our records that the UST system has not been closed in accordance with NCAC Title 15A Subchapter 2N Sections .0802 and .0803 and 40 CFR 280.71 and 280.72, but, review of your assessment would seem to indicate that no further action is required at this time. However, this does not absolve you of any responsibility for contamination that may not have been detected or reported during the site assessment.

If you have any questions, please feel free to contact me at the letterhead address or telephone number.

Sincerely,

A handwritten signature in cursive script that reads "Thomas A. Salley".
